Para-cycling Event Integration Document

Integrating athletes with a disability into an event at the provincial or club level requires a little forethought and planning. This document complements the Para-cycling LTAD and will concentrate on issues regarding cycling for athletes with impairment.

Para-cycling athletes deserve access to appropriate training, competition/ events, venues, media and club structure. At this time there is a small number of clubs across Canada that actively integrates and promotes programs for their Para-cycling members. These clubs are mostly found in Alberta and Quebec however Ontario, British Columbia and the Atlantic provinces are getting more involved in the program and clubs are following along in each Province.

The following impairments represent the UCI Para-cycling criteria for participation in a sanctioned race. Para-cycling classes are based on the athlete's functionality level.
